

Video Review: Transcript and Edit Notes (Zoom, 2 Oct 2026)

Purpose of this document: a single file to give to Claude (chat) so it can read the review transcript and the edit list together. Section 1 explains how to read it. Section 2 is the organized edit list. Section 3 lists the contradictions and open questions. Section 4 is the full cleaned transcript.

1. Context and how to read this

- **What happened:** Mac (video editor) and Ed Strachar (the client/boss, who is the reviewer) reviewed a promo video called "Reading Genius" (about 24 minutes 22 seconds long) on a Zoom call lasting 1 hour 17 minutes. Jane (Ed's assistant) was also on the call and supplies testimonial clips. Chad is an assistant who was mentioned but was not on the call.
 - **The video reviewed:** the newest version of "Reading Genius.mp4" in Frame.io, shown on screen by Ed during the call.
 - **Goal of the review:** cut roughly 2 minutes of material, fix awkward edits left by the previous editor (Dion), and insert testimonial clips and graphics at specific points.
 - **Two kinds of time in this document:**
 - **Video timecode** (format `hh:mm:ss:ff`, 24 frames per second assumed) is the position in the video. It was read off the Frame.io player on screen. Where it appears, it is the one to edit by.
 - **Zoom time** (format `h:mm:ss`) is the position in the call recording and the transcript. These are not the same as video timecodes.
 - **Transcript caveats:**
 - The transcript is auto-generated by Zoom and is noisy (mis-heard words, repeated phrases).
 - Zoom labeled almost every line as the same speaker ("Ed Strachar"), including the video's own audio playing during the screen share and Ed's live instructions. In the transcript below, the label is dropped for those lines. Only lines clearly from Mac or Jane are labeled. Tell apart Ed's instructions ("cut this", "take this out", "right there") from the playing video's narration by context.
 - Ed often paused, replayed and scrubbed the video, so a timecode can be a few seconds off. The quoted lines in each item are the reliable way to find the exact point.
 - **Frame.io:** all of the items in section 2 were also posted as timestamped comments on that video version in Frame.io (31 comments, as a ranged comment where Ed gave a clear range).
-

2. Edit list (in video order)

Tags: **CUT** remove, **INSERT** add a testimonial or graphic, **KEEP** leave as is, **FIX** repair, **CHECK** unclear or contradictory, confirm with Ed. IDs (C = cut/fix, T = testimonial, G = graphic) match the Frame.io comments.

S0: Overall notes

- **Video timecode:** 00:00:00:00
- **Zoom time:** -
- REVIEW NOTES (Zoom review, 2 Oct 2026, Ed + Mac + Jane). Comments below are the edit list in video order. Tags: CUT = remove, INSERT = add testimonial or graphic, KEEP, FIX, CHECK = unclear or contradictory, confirm with Ed. Where Ed changed his mind, the comment says what he said first, what he said later, and which one wins. Timecodes are approximate: Ed paused and scrubbed during the review, so use the quoted lines to find the exact point. Overall: the cut currently runs about 24:22 and Ed wants roughly 2 minutes removed, then the testimonials added. Open items: Jane to send the original file for the hook gap, the Dawn Graves clip and the Terry Weinberg video; Chad to send the basketball study citation; Ed to send the Asher bio and the Fathom notes.

C1: Hook: remove clutter

- **Video timecode:** 00:00:03:19 to 00:00:12:12
- **Zoom time:** 0:03:23–0:03:48
- CUT/FIX (C1) Hook: remove the clutter around Ed. Only Ed should be on screen. Said twice in the review ('it should just be me', 'this just needs to be me').

C2: Hook: fix the continuity gap

- **Video timecode:** 00:00:22:17 to 00:00:25:07
- **Zoom time:** 0:04:00–0:04:15
- FIX (C2) Hook continuity gap here. Fill it with what Ed says just before this line in the ORIGINAL file (Jane is sending that file).

C3: Intro stories: cut repeated Auckland lines

- **Video timecode:** 00:00:25:07 to 00:00:38:00
- **Zoom time:** 0:04:36–0:06:50
- CUT (C3) Remove the repeated Auckland / Auckland Normal lines (Ed: 'all redundant', 'unnecessary'). Keep the Alaska story and its B-roll.

C4: Keep: disbelief line and GOOYOW

- **Video timecode:** 00:00:55:16
- **Zoom time:** 0:07:15
- KEEP (C4) CONTEXT: Ed first said to cut the 'adults take longer... more disbelief... self-doubt' line, then reversed a few seconds later: 'Actually, you can keep that in.' Final decision = KEEP it, and keep the GOOYOW (Get Out Of Your Own Way) line too.

C5: Re-take: "Realize this. You opened your eyes at birth."

- **Video timecode:** 00:01:24:13 to 00:01:26:07
- **Zoom time:** 0:08:12–0:08:46
- FIX (C5) Use the NEW re-recorded take of 'Realize this. You opened your eyes at birth.' (Ed sent the clip on Telegram) to fix the jump here ('discontinuity'). Ed asked for 'Take 2'.

C6: Cut the hunter/caveman peripheral-vision story

- **Video timecode:** 00:02:01:16 to 00:02:14:16
- **Zoom time:** 0:10:20-0:12:19
- CUT (C6) Remove the hunter/caveman peripheral-vision story, from here to 00:02:14:16. Resume at "When I coached basketball players...". Ed: take out a lot of the stories. CONTEXT: Ed first said 'let's take this out' and 'take that out' about the basketball lines, then appeared to clarify he meant the periphery/hunter part ('we cut out the part about the hunter... come back in, When I coached basketball players').

C7: Graphic: Mental Training program

- **Video timecode:** 00:02:17:10
- **Zoom time:** 0:12:34
- INSERT (C7) Show the graphic for Ed's program 'Mental Training for Life, Sport and Success' when he mentions it. Ed will supply the image.

C8: Cut the East German weightlifters story

- **Video timecode:** 00:02:29:08 to 00:02:46:02
- **Zoom time:** 0:15:03–0:15:36
- CUT (C8) Remove the East German weightlifters story and resume at the foul-shots example. CONTEXT: Ed said 'we don't even need this, take this out', but then re-read the story and said 'come in here' before the next one, so the exact resume point is unclear. The next line says 'another famous story': change it to 'a famous story' once this is cut. CHECK with Ed if unsure.

C9: On-screen reference: basketball study

- **Video timecode:** 00:02:58:18 to 00:03:15:13
- **Zoom time:** 0:16:44–0:17:41
- INSERT (C9) On-screen reference/citation for the basketball mental-training study (23-24%). Chad is to supply the study details and Ed will also send them on Telegram. Ed: 'there's always someone that's going to check on that.'

T6: Jonathan Ezzie (roller hockey)

- **Video timecode:** 00:03:54:19
- **Zoom time:** 1:06:38
- INSERT (T6) Testimonial: Jonathan Ezzie (roller hockey), right after 'Would you agree?' Use 'I did the course two weeks ago... 195 pages. It is absolutely phenomenal.' CHECK: Ed mentioned a crop on this clip ('that's all under there'). Confirm which part of the frame to remove. Jane is sending the clip.

C10: Remove the repeated "open your eyes at birth" block

- **Video timecode:** 00:05:01:18 to 00:05:06:16
- **Zoom time:** 0:19:41–0:20:29
- CUT (C10) Remove the repeated 'open your eyes at birth / mom and dad' block (Ed: 'we already saw this', 'obviously redundant'). Use the phrase from the original at video 1:28 ('let me share with you...'). CHECK: the review audio is unclear here, so confirm the exact lines with Ed.

C11: Tighten the join

- **Video timecode:** 00:05:22:01 to 00:05:22:08
- **Zoom time:** 0:20:44–0:21:00
- **FIX (C11)** Tighten the join to '...You never needed lessons. When you learn to read, 3, 4, 5, 6 years old...'.
CHECK: the cut points were unclear in the review.

G1: Audio-channel diagram: label the lines

- **Video timecode:** 00:06:49:23
- **Zoom time:** 0:22:28–0:23:26
- **FIX (G1)** Audio-channel diagram: label the lines and make the AUDIO channel much smaller and thinner (weak) next to the visual 'fiber-optic superhighway' channel. Jane: 'smaller, yellow'.

T7: Deborah (eyes / reading glasses)

- **Video timecode:** 00:07:35:12
- **Zoom time:** 1:09:18–1:09:26
- **INSERT (T7)** Testimonial: Deborah (eyes / reading glasses), after '...read one word' and before 'it even gets worse'. Use 'I can actually see larger sections of the page...' to '...which is fantastic' (drop the repeat).
CONFLICT: Ed also placed Martin Crowe at this exact spot (next comment). Ask Ed whether Deborah replaces Crowe or Crowe moves elsewhere.

T3: Martin Crowe

- **Video timecode:** 00:07:41:12
- **Zoom time:** 0:58:31
- **INSERT (T3)** Testimonial: Martin Crowe, 'I began to read a third of a page at a time', right before 'it even gets worse'. **CONFLICT:** Ed later put Deborah at this same spot (previous comment). Ask Ed which one stays here.

T5: Sonya (11-year-old, Australia)

- **Video timecode:** 00:09:29:22
- **Zoom time:** 1:03:17
- **INSERT (T5)** Testimonial: Sonya (11 years old, Australia), after 'What if you could employ that intelligence while reading? ... I'll show you how to do that.' Use 'I read 117 pages in 6 minutes. Did you understand better? Yes, much better. What was different? I really got into the book... I hope I can do that with all the books I read.' Cut 'Feel like I understood him? Yep' and 'Oh wow'. **CONTEXT:** Ed first said to start from 'I read a hundred', then said 'cut that out', so the final trim is the 117-pages version.

T2: Dawn Graves (schoolteacher)

- **Video timecode:** 00:11:31:00
- **Zoom time:** 0:56:12–0:57:57
- **INSERT (T2)** Testimonial: Dawn Graves (schoolteacher), right after 'regardless of whether it's a story or a book on science, it doesn't matter'. Line: '...and I felt them. They were scary stories, so I kind of scared myself.' **STATUS:** Jane had not found the clip yet. She is sending it.

T8: Medical student (Will/Willie Harper)

- **Video timecode:** 00:12:34:18
- **Zoom time:** 1:10:45–1:11:03
- INSERT (T8) Testimonial: medical student (Will/Willie Harper): 'At the end I was reading about 10 pages a minute... I used to read a page a minute.' Place just before 'However, that's a standardized test'. CHECK: Ed trailed off ('we take that... put that...'), so this placement is inferred.

T9: George Owidi

- **Video timecode:** 00:13:34:18
- **Zoom time:** 1:12:01
- INSERT (T9) Testimonial: George Owidi, right before 'So you want proof?' Ed asked for more diversity among the testimonials and this one covers it.

T1: Michael Tracy

- **Video timecode:** 00:15:25:10
- **Zoom time:** 0:53:28–0:55:37
- INSERT (T1) Testimonial: Michael Tracy (spell M-I-C-H-E-L T-R-A-C-Y), inside the Silicon Valley principal's-son story. Keep it tight and quick. Use 'I went from reading a third of a page a minute to 60 pages a minute' (somewhere around 35-45 seconds into his source file). CHECK: Ed said 'we'll find an exact number' for the in-point. Confirm with him.

G2: Dr. James Asher bio graphic

- **Video timecode:** 00:17:32:13 to 00:17:54:09
- **Zoom time:** 0:36:59–0:42:23
- INSERT (G2) Dr. James Asher photo + bio graphic for the last ~15 seconds of this segment, ending at '...so yeah, he was right on'. Use the formal Wikipedia/encyclopedia-style version, TOP HALF ONLY (San Jose State University, birth and death dates, Professor Emeritus, Total Physical Response). CONTEXT: the first version (colorful, cartoony) was rejected and the first files would not load. Ed is sending the final version on Telegram.

C13: Cut "this is 2026 going on 27 real fast"

- **Video timecode:** 00:19:20:13 to 00:19:21:04
- **Zoom time:** 0:44:58–0:45:30
- CUT (C13) Remove 'this is 2026 going on 27 real fast'. Keep '...we got AI, artificial intelligence'. Ed: 'this is out'.

C12: Undo Dion's edit: mind-mapping / Tony Buzan

- **Video timecode:** 00:19:21:01 to 00:19:22:23
- **Zoom time:** 0:43:58–0:44:50
- FIX (C12) Undo the previous editor's (Dion's) edit in the mind-mapping / Tony Buzan section: the Buzan selfie and 'writer's block' lines repeat. Play them once. Frames approximate: Ed was scrubbing here.

T4: Terry Weinberg (Coast Guard Auxiliary)

- **Video timecode:** 00:21:46:21
- **Zoom time:** 1:02:28–1:02:43
- INSERT (T4) Testimonial: Terry Weinberg (Coast Guard Auxiliary, read 5 books, 85% on the test). Use the whole clip, right after 'Which three books would you read first, and why?' CONFLICT: Ed first said to put it after 'I love health' (see the health-lines comment further on), then later said after 'which 3 books'. Latest instruction wins = after 'which 3 books'. Jane is sending the actual video (Ed only showed a still).

C14: Fix the clumsy duplicate

- **Video timecode:** 00:21:47:09 to 00:21:52:18
- **Zoom time:** 0:49:29–0:49:54
- FIX (C14) Duplicate / clumsy edit: the conscious/subconscious paragraph and 'which 3 books...' repeat. Ed: 'that's a real clumsy edit'. Remove the repeat. Frames approximate: Ed replayed this part.

C15: Health lines: cut "drugs and surgery... painful"

- **Video timecode:** 00:22:14:09 to 00:22:22:01
- **Zoom time:** 0:59:34–1:00:12
- CUT (C15) Health lines: cut 'with their drugs and (toxic) surgery... debilitating, painful'. Resume at 'Yeah, I want to stay away from that. I love health.' CONFLICT: Ed first said to stop at 'staying out of the hospital', then later kept 'in doctors' clutches' and cut after it. Confirm the exact cut point with Ed. Also note Terry Weinberg was first placed after 'I love health' but that was superseded (see T4).

G3: Healing Genius logo

- **Video timecode:** 00:22:29:08
- **Zoom time:** 0:50:36
- INSERT (G3) Show the Healing Genius logo when he says 'Healing Genius'.

G4: Discount code ED777

- **Video timecode:** 00:22:29:12 to 00:22:43:14
- **Zoom time:** 0:50:42–0:50:57
- INSERT (G4) Show the discount code ED777 on screen while he says it.

G6: Visual swap: gender-neutral figure

- **Video timecode:** 00:24:01:22
- **Zoom time:** 0:52:20–0:52:28
- FIX (G6) Swap the visual on screen for a gender-neutral figure with no crossed legs (Ed's note while this part played). CHECK: Ed did not name the exact shot. Confirm which one.

G5: Show the discount code again

- **Video timecode:** 00:24:20:02
- **Zoom time:** 0:52:47

- **INSERT (G5)** Show the discount code (ED777) again at the sign-off ('much love to you, I'm Ed Stracher, thank you for watching').
-

3. Contradictions, reversals and open questions

Where Ed changed his mind (the later instruction wins unless noted):

- **C4, "adults take longer... more disbelief" line:** first said to cut, then "Actually, you can keep that in." Final: KEEP.
- **C6, hunter story:** first said "let's take this out" and "take that out" (unclear which lines), then clarified: cut the hunter/caveman peripheral-vision story and come back in at "When I coached basketball players."
- **C8, East German weightlifters story:** said "we don't even need this, take this out", then re-read the story and said "come in here". The resume point is unclear. The next line says "another famous story" and should become "a famous story" after the cut.
- **C15, health lines ("doctors' clutches"):** first said to stop at "staying out of the hospital, that's it", then later kept "in doctors' clutches" and cut after it. Confirm the exact cut.
- **T4, Terry Weinberg testimonial:** first placed after "I love health", later placed after "Which three books would you read first, and why?" Final: after "which 3 books."
- **T5, Sonya testimonial:** first said to start from "I read a hundred", then "cut that out". Final trim: "I read 117 pages in 6 minutes... I hope I can do that with all the books I read."
- **G2, Dr. Asher bio graphic:** first version (colorful, cartoony) rejected; final is a formal Wikipedia-style version, top half only. The first files would not load.

Conflicts to ask Ed about:

- **T3 and T7:** Martin Crowe and Deborah were both placed "right before it even gets worse". Does Deborah replace Crowe, or does Crowe move elsewhere?
- **T1, Michael Tracy:** Ed said "we'll find an exact number" for the in-point and never gave one.
- **T6, Jonathan Ezzie:** Ed mentioned a crop ("that's all under there"). Which part of the frame?
- **T8, medical student:** Ed trailed off. The placement (before "However, that's a standardized test") is inferred.
- **C10 and C11:** the review audio was garbled. Exact lines to remove are unclear.
- **G6:** Ed asked for a gender-neutral figure with no crossed legs but did not name the shot.
- **Monday:** Ed said "I'll see you Monday" (likely 5 Oct 2026). It is not clear whether that is the delivery or the next review.

Who owes what:

- **Jane to Mac:** the original file for the hook gap (C2), the Dawn Graves clip (T2), the actual Terry Weinberg video (T4), and the review notes.
 - **Chad to Ed/Mac:** the basketball study citation (C9) and a loadable Dr. Asher bio.
 - **Ed to Mac:** the Asher bio (final version), the Fathom notes and the Telegram assets.
-

4. Full transcript (cleaned)

Format: [h:mm:ss] is Zoom time. Lines with no label are Ed or the video playing (see caveats in section 1).

[0:00:01] Room.

[0:00:02] On YouTube. And I'm also on...

[0:00:05] Instagram, and LinkedIn, and Facebook, and

[0:00:08] All that stuff. Amazing. Just look for the guy with laser eyes, right? Yeah, exactly. Alright. Good to see you. Thank you, guys. Peace!

[0:00:22] Okay, hi Matt.

[0:00:24] I appreciate you taking this over.

[0:00:32] Dion was exhausting. He's a good guy, but exhausting.

[0:00:37] I just... when he said, This looks okay, and it made no sense. I'm like, okay.

[0:00:44] You cannot continue.

[0:01:05] okay so I'll give you in telegram

[0:01:13] The Frame.io version working with...

[0:01:21] **Mac:** The last revision.

[0:01:40] Can I go to the bathroom real quick, Ed?

[0:01:42] **Mac:** This moment.

[0:03:01] Everything come out okay?

[0:03:05] **Mac:** Good.

[0:03:06] Everything come out okay?

[0:03:08] Yeah.

[0:03:20] What percent of all books purchased?

[0:03:21] Never get red past the first time.

[0:03:23] Okay, so this is his hook.

[0:03:26] But you got too much around me.

[0:03:29] It should just be me.

[0:03:31] Can you follow? There's too much clutter here.

[0:03:34] Alright.

[0:03:35] Yeah.

[0:03:37] Can you imagine that?

[0:03:38] 90%. The average American, it's been said, reads less than one book a year. Now, to watch 4 hours... Again, this just needs to be me.

[0:03:48] See, this is, for TV, or more... less than one book.

[0:03:53] What's happening with their intelligence as they're watching 4 hours of TV?

[0:04:00] When people see people reading... Okay, so right here... There's a gap.

[0:04:07] There's a continuity gap.

[0:04:09] And if you go to the original file, what I say before this can fill that in.

[0:04:15] You follow?

[0:04:21] done it So, Jane is gonna be sending you that.

[0:04:36] My dad there, it's very hard for him to

[0:04:39] In fact, in this school, in Auckland, New Zealand, where I was giving seminars at Auckland Normal in Tumi.

[0:04:46] Okay... At Auckland, normal intermediate and Auckland can come out.

[0:04:50] It's all redundant.

[0:05:22] Now, I'm looking for the script...

[0:05:51] Okay, I don't have it.

[0:05:55] in Auburn.

[0:05:56] And they invited me in to teach. This is cool and all that.

[0:06:00] Alright, so there's a school in Alaska, so... Here, you keep the B-roll.

[0:06:08] But you can just...

[0:06:13] Was me in the teach. This is cool in Alaska. This took two and a half hours. So you come back in here. You can see people reading like that there. It's very hard for them to read.

[0:06:23] In fact, in this school, in Auckland, New Zealand, where I was giving sep... So, in Auckland, New Zealand, where they invited me in to teach.

[0:06:32] I was giving seminars, and they invited me in to teach.

[0:06:37] All this at Auckland Normal is unnecessary.

[0:06:43] Okay, use your common sense, you'll see.

[0:06:47] in Auburn.

[0:06:48] And they invited me in to teach.

[0:06:49] This is cool in Alaska. This took two and a half hours.

[0:06:53] These kids are a little older.

[0:06:54] 14 to 17, about. These adults took an entire day. Adults take a little longer, because they have a lot... Adults take a little longer cut.

[0:07:06] Cut out because they have a lot more disbelief.

[0:07:09] More disbelief, they have a lot more self-doubt, and that all blocks them, so.

[0:07:15] Actually, you can keep that in.

[0:07:18] I have a saying, GUYO. G-O-O-Y-O-W. Get out of your own way. And that's what we need to do in order to read like this. So let me explain to you how this works, so that you understand

[0:07:31] buy into The concept... And the simple premises that this is based on, and once I... Calling Jane.

[0:07:47] I tell you this, you're gonna realize AI can do

[0:07:52] But B, how incompetent that incredible place called the school system

[0:07:59] You opened your eyes at birth. You could see mom and dad and the doctor, the nurse.

[0:08:07] So, there's a discontinuity here.

[0:08:12] Really, yeah.

[0:08:13] open So, again, realize this, I need to say, realize this.

[0:08:21] Let me just send it to you in case it's not there.

[0:08:25] I believe it is there.

[0:08:40] Realize this.

[0:08:42] You opened your eyes at birth.

[0:08:45] Take 2.

[0:08:46] Realize this. You opened your eyes at birth.

[0:08:51] Okay, so now we got the recording on the... Zoom video.

[0:08:56] And, and the one I just sent you.

[0:09:06] Jane, are you here?

[0:09:08] Okay, there she is. Jane, no more bathroom breaks for a week for you, you've been taking too many.

[0:09:15] **Jane:** Okay?

[0:09:18] That's it, you just carry around a plastic bag with you.

[0:09:23] Okay.

[0:09:24] I'm giving him the instructions I gave Dion.

[0:09:28] **Jane:** Okay.

[0:09:28] You could see mom and daddy, the doctor, the nurses, I'm guessing.

[0:09:34] The birds, the trees, the cars, the dogs, everything, all at the same time, at the speed of light. You never needed lessons.

[0:09:43] Yeah. So, first off, let's just work and talk about our vision. Your eyes. There's two elements to your vision. There's the focal vision, and there's the peripheral vision.

[0:09:54] But the peripheral vision is actually about two-thirds of your

[0:09:57] It's got two-thirds of the rods and cones, approximately.

[0:10:00] And... they theorize, well, when man was hunting in a caveman, he had to, you know, watch, and he was attacked by the side... from the sides, and so he had to really pay attention to his periphery. The periphery is what we respond to much quicker. When I coached, basketball... Okay, this is how.

[0:10:20] actually... Hold on.

[0:10:29] Yeah, let's take this out.

[0:10:32] Cut, right here. Basketball players. And did mental training with these basketball players. Mental training is a big part of reading.

[0:10:39] train

[0:10:51] Okay, I want to take out a lot of the stories. You never needed lessons.

[0:10:57] Yeah, so first off, let's just work...

[0:11:01] The peripheral vision is actually about two-thirds of your vision. It's got two-thirds of the rods and cones, approximately.

[0:11:07] And... Cut, right before end.

[0:11:12] They theorize, well, when man was hunting in a caveman, he had to, you know, watch and he was attacked by the side, from the sides and so he had to really pay attention to his periphery. The periphery is

[0:11:23] Come back in here.

[0:11:25] What we respond to much quicker. Wayne and I... This is out.

[0:11:30] Actually, you can take out that periphery.

[0:11:35] Take that out. Coached, basketball players and did mental training with these basketball players. Mental training is a big part of reading genius, training the mind to perform better.

[0:11:47] You train the mind to perform better, the body performs better. Body can even get stronger.

[0:11:52] mental training. There's a famous story about East German weight. Okay.

[0:12:03] So, we cut out the part about the hunter.

[0:12:07] We cut out this.

[0:12:11] And you come back in, When I coached basketball players.

[0:12:16] Come back in here.

[0:12:19] basketball players, and did mental training with these basketball players. Mental training is a big part of reading genius, training the mind to perform better. You train the mind to perform better... Now, when I say I did mental training.

[0:12:34] You show one of my program mental training, For life, sport, and success.

[0:12:42] And... I'll give you that.

[0:12:47] Here, in just a moment.

[0:13:05] Okay.

[0:13:08] This is what it looks like.

[0:13:11] Okay, so you bring that up... And...

[0:13:17] I'll, again, put it in your file here.

[0:13:26] By the way, Mac, just coming to your wife for a second.

[0:13:32] What I do when I do healing is I remove dark and chaotic energies.

[0:13:38] And I restore the soul.

[0:13:40] So, when the body gets weak.

[0:13:43] Okay, it starts breaking down, pain, etc, etc, etc.

[0:13:47] So don't ever mistake what I do to a doctor, don't, doctors have no fucking clue.

[0:13:54] About healing and health. They don't. They know about disease, they know about bacteria.

[0:14:00] Okay, they know their x-rays and blood tests. When it comes to health and healing, no fucking clue.

[0:14:06] Less than your average 10-year-old.

[0:14:08] Okay? So, you know, when your wife's hurting, her energy field is weak. I can enhance the energy field if she's open to it.

[0:14:16] She's not open to it.

[0:14:18] Forget it. So I just offer you that and her. She has to be open and receptive to it. But Jane is one that can tell you amongst all the people who work for me that this is what we do here.

[0:14:33] Okay.

[0:14:35] Back here now, so... Mental training...

[0:14:40] We've got to give you that... Okay, there you have it.

[0:14:47] with these basketball players. Mental training is a big part of reading.

[0:14:50] It's training the mind to perform better. So even here, you would have the program right here?

[0:14:57] Better, you train the mind to perform better, the body performs better, body can even get stronger.

[0:15:03] There's a famous story about East German weightlifters, and they would mentally train... Actually, we don't even need this.

[0:15:12] Take this out. Famous story.

[0:15:16] stronger mental training. There's a cut.

[0:15:20] There's a famous story about East German weightlifter.

[0:15:24] And they would mentally train lifting 500 pounds, or however many pounds they were lifting, and they would literally mentally rehearse that.

[0:15:34] And they got incredible results.

[0:15:36] There's another famous story.

[0:15:38] Come in here.

[0:15:41] An example of two...

[0:15:44] groups of people and they were each training them to shoot foul shots, best of all.

[0:15:48] And one team just got training on the physical court.

[0:15:52] Okay, now I'm gonna give you this study.

[0:15:55] I have this study.

[0:16:00] Chad, can you give me that study about the basketball mental training 23 and 24% that we talked about the other day?

[0:16:22] Chad, can you please give me that...

[0:16:25] Study citation about the mental training in basketball.

[0:16:30] 23 and 24% that we talked about the other day.

[0:16:34] Thank you.

[0:16:44] Okay, you're just gonna put reference over here, reference, and I'm gonna give you the study details.

[0:16:58] And foul shots and another team didn't get any physical training, they got mental training, mentally rehearsing, shooting the foul shots in their mind. So when they compared after a certain amount of training.

[0:17:09] groups both group and crew dramatically.

[0:17:13] From where they started, and...

[0:17:20] There it is.

[0:17:35] Okay.

[0:17:36] So, you just cite that, I'll put it in Telegram.

[0:17:41] You just put reference.

[0:17:51] There's always someone that's gonna check on that.

[0:17:55] And the interesting thing was, they each improved to about the same level. So, whether they had the physical training or the mental training, they each improved to about the same level. Now, the real question is, what if they had both the physical and the mental training? Well, that's optimal.

[0:18:08] And that's what crows do.

[0:18:10] The physical and the medical.

[0:18:12] Well, in Reading Genius, we do the mental training, the physical training in the book, it's just Two pages.

[0:18:18] Trivial.

[0:18:19] Like basketball or weightlifting.

[0:18:20] You work brilliantly. Once your mind understands exactly what

[0:18:25] You're fully committed, and full commitment is always what it takes for you

[0:18:30] And us, to perform at our best.

[0:18:33] Would you agree?

[0:18:33] And so, using both your focal and peripheral vision is key when reading. Now, just by knowing that isn't going to help you read faster. Why? Because your habitual

[0:18:45] Nature is to read word by word. And if you're really good, and by profession, lawyers, generally speaking, are probably the best readers.

[0:18:53] They have to be.

[0:18:54] law school without me.

[0:18:56] And they read somewhere between 400 and 600 words a minute, in my observation.

[0:19:00] Which is about double.

[0:19:02] triple the average.

[0:19:03] It's still way below what many graduates of the

[0:19:08] But for starters, they're among the best.

[0:19:11] Now, with that being said, instead of reading one word at a time, they're reading maybe

[0:19:16] Crazy. And as we...

[0:19:19] Start reading in phrases and groups of words we understand better, because we actually think and remember in ideas, not words.

[0:19:26] the concepts we often remember.

[0:19:28] In pictures, okay, visual concepts.

[0:19:31] and physical concept.

[0:19:32] So with the Reading Genius system, you not only learn to use your peripheral vision.

[0:19:38] We break the habit of pronouncing each word.

[0:19:41] Let me share with you.

[0:19:42] When it comes to your vision, I want you to think.

[0:19:46] Open your eyes at birth.

[0:19:48] You could see mom and dad and your doctor.

[0:19:51] We already saw this.

[0:19:54] When it comes... See, actually, This, let me share with you this, is what you could use...

[0:20:01] At the beginning, when we were looking for an inn.

[0:20:04] At 1:28.

[0:20:06] You with me?

[0:20:07] your peripheral vision.

[0:20:09] break the habit of pronouncing each word. And let me share with you.

[0:20:13] Let me share with you this, there it is.

[0:20:15] That's what he didn't use at 128. So there you have your phrase.

[0:20:22] And that, this comes out, this is obviously redundant.

[0:20:25] So that comes out.

[0:20:27] I want you to think.

[0:20:29] You open your eyes at birth.

[0:20:31] Coming in.

[0:20:32] going out. That's our first... you're looking at all coming in.

[0:20:36] At least I did. Everyone I know, Sam and Shev were up at the same time.

[0:20:41] At the speed of light.

[0:20:42] You never needed lessons.

[0:20:44] You learn.

[0:20:45] Right here.

[0:20:48] Marjorie?

[0:20:50] Come in.

[0:20:52] When you learn to read.

[0:20:55] Come in right there.

[0:20:58] You never needed lessons.

[0:21:00] When you learn to read, 3, 4, 5, 6 years old, you had to pronounce the word one syllable at a time, Chevrolet.

[0:21:09] the car went up the hill, Mississippi, right? And then, at some point, you had to stand up, at least I did, everyone I know, stand up in front of the class.

[0:21:21] heat coming in.

[0:21:23] going out.

[0:21:24] looking at all the worse.

[0:21:26] Many of them you've never seen before, and you mispronounce.

[0:21:30] What happens? What does the rest of the class do? Yeah, they giggle. And that's our first entry into public speaking.

[0:21:37] What's the number one fear ahead of death, ahead of getting ripped apart by a lion?

[0:21:42] How are you getting... rolled over by an ET.

[0:21:45] The number one fear among people.

[0:21:47] worldwide.

[0:21:49] Public speaking.

[0:21:50] We taught him that fear in reading class.

[0:21:52] And public speaking is not a natural fear. I mean, most... most babies will get up, you know, peanut butter on their face in diapers and dance for you. I mean, you know, they're not shy of performing, okay? But after reading class, boy, standing up and reading or presenting in front of a group.

[0:22:08] terrifying.

[0:22:09] from that experience.

[0:22:11] This is what certified teachers actually taught. So you learn to read one word at a time.

[0:22:17] Because you can only pronounce one word at a time, at the speed of sound. And through a very limited

[0:22:23] neurological pathways.

[0:22:25] We call it the audio verbal channel.

[0:22:28] Keep it simple. Your eyes, however, your eyes...

[0:22:33] You need to label this audio channel.

[0:22:38] And it needs to be smaller and thinner.

[0:22:41] Because we're comparing it to the visual cortex in the eyes.

[0:22:44] neurological pathway.

[0:22:46] We'll call it the audio...

[0:22:49] Keep it simple. Your eyes, however, your eyes are basically an extension of your brain. When a baby is formed inside the mother's womb.

[0:22:56] The eyes are literally part of the brain, and it's one organ that... I can't hear you, man. What?

[0:23:02] **Mac:** Clarification, I should label the lines.

[0:23:08] Yeah, audio chat.

[0:23:10] Audio channel, and make it smaller and skinnier.

[0:23:14] **Mac:** And.

[0:23:14] supposed to look very.

[0:23:15] **Jane:** smaller yellow.

[0:23:19] Audio channel.

[0:23:21] And it should be very small and weak.

[0:23:23] In comparison.

[0:23:26] Keep it simple. Your eyes, however, your eyes are basically an extension of your brain. When a baby is born.

[0:23:32] inside the mother's womb. The eyes are literally part of the brain.

[0:23:36] And it's one organ that then becomes That neural pathway Often referred to as

[0:23:44] It's like a huge fiber optic superhighway.

[0:23:47] The verbal is, like, a little... Dirt bypass.

[0:23:51] Two cans and a string, as opposed to this big fiber optic, multiple fibers.

[0:23:57] That exists between the eyes and the brain.

[0:24:00] Good birth and everyday blessings.

[0:24:01] So, imagine what's possible, then, if you could read using that superhighway.

[0:24:08] It works at the speed of light and can see everything it wants.

[0:24:11] Versus how you've habitually been trained to just read one word.

[0:24:16] Yeah. It even gets worse, though, you see, because before books were mass-produced, they thought that not everyone had the capacity to read.

[0:24:25] That only special people, only aristocrats, and children of kings and queens, because books were very expensive, they were hand-copied at the time. So they only showed certain people how to read.

[0:24:36] Okay.

[0:24:39] which were... wealthy.

[0:24:41] Well, then as books...

[0:24:43] It became mass-produced after the invention of the printing press. They realized that everyone could read, and wow, they were a big breakthrough. Yeah, it was in the 1500s. They haven't changed the way they taught reading since the 1500s.

[0:24:54] Alright, we've made all these... incredible inventions and progress.

[0:25:00] in evolutions.

[0:25:03] in technology.

[0:25:04] transportation Communications, automation, and brain... understanding and inventions.

[0:25:12] Developments, and so forth. And yet, we still teach reading the same way.

[0:25:16] It's pathetic. Really pathetic.

[0:25:19] So now, we read Expanding Our Vision, we break the habit, and we Use that neural pathway.

[0:25:26] Really powerful concept. Follow me. And this is something you already have, I don't have to teach you this.

[0:25:32] All we have to do is break the habit that you learned in school, and that habit is not broken.

[0:25:37] for years now.

[0:25:40] In 10 minutes.

[0:25:42] minutes But there's more. We have this incredible heart. The heart literally has brain cells in it.

[0:25:49] And there's actually two hearts. There's the physical heart that pumps blood, and there's the spiritual heart that pumps love. Both of them have incredible intelligence.

[0:25:59] Wisdom.

[0:26:00] and higher connections.

[0:26:02] Yeah. What if you could employ that intelligence while reading?

[0:26:08] I show you how to do that.

[0:26:09] Our brain. There's a right brain and a left brain. This only came out in 1975. Roger Sperry.

[0:26:16] Nobel Prize for his research in understanding difference between right and left

[0:26:20] And simply put, the left brain Sequence, logic, and language

[0:26:25] And language is sequential, right? John chased Sally up the hill. Well, the right brain is where feelings, emotions, pictures come from. Well, the right brain is dormant.

[0:26:37] It's not used. So, while the left brain is trying to read, the right brain

[0:26:41] is unemployed, and what do typical unemployed people do? They talk to themselves and watch movies.

[0:26:47] What are people's biggest challenge when they read? They talk to themselves and daydream. They're thinking of 5 or 10 other things while they're reading.

[0:26:54] Know anybody like that? Yeah. So, when we get the right and the left brain fully employed in

[0:27:02] Wow. I teach kids and adults how to create this book into a movie.

[0:27:08] I teach you...

[0:27:09] you learn how to connect to the spirit of the author, or authors, of the book. So, you're reading Macbeth, you connect to Shakespeare, you understand

[0:27:19] You feel, you sense, right? You're reading 7 Habits of Highly Effective People.

[0:27:23] Send us Dr. Stephen Covey, okay, or whatever authors you are.

[0:27:28] Boy, that's really powerful. It literally magnetized.

[0:27:32] Your whole mind, body, and soul to the book. This is when you

[0:27:38] Now, I show you how to do this with a book. I show you how to build and utilize all these natural

[0:27:44] intelligences within you.

[0:27:46] not giving me You already have them, you've never been shown, for the most part, for most people.

[0:27:53] How to use them.

[0:27:54] It gets better. We have this thing called PLD.

[0:27:58] Emotions.

[0:27:59] Emotional intelligence.

[0:28:01] Well, what if I could show you how to get your emotions and your feelings involved so you can feel what's happening in that book? And regardless of whether it's a story or a book on science, it doesn't matter. You have emotional intelligence.

[0:28:13] You have physical intelligence.

[0:28:16] Distributed throughout your body, your brain is

[0:28:20] Often referred to as the center of your intelligence, but we know we have this nervous system, which is part of the brain.

[0:28:26] distributed throughout our entire body. And the intelligence is what we call a neural net. It's distributed through the entire body. So, this is where, whether you're learning to play basketball, or tennis, or piano, you physically learn. This is part of physical intelligence.

[0:28:41] Well, there is intelligence value there.

[0:28:44] And what if we can employ that into the region?

[0:28:46] process.

[0:28:47] Wow! And that's what you learn exactly to do. Is it difficult? None of these kids, none of these adults thought so. No, these are simple processes.

[0:28:57] What's difficult is for you to overcome your limiting beliefs, saying, that's not possible, I don't believe that. You know, show me some proof, okay? Here's a letter from the U.S. Air Force Academy. Read it. Look. In a standardized test, after a few hours of instruction.

[0:29:14] students improved in speed 550% measured, and their comprehension improved. However, that's a standardized test.

[0:29:23] There's 3 paragraphs of multiple choice questions, which means they have to give you the answer, and you have to recognize it.

[0:29:29] Which is not really a true test of comprehension. It's just answer recognition.

[0:29:33] Then when we tested them the real way, a real test of reading.

[0:29:37] Using books. Not little multiple choice questions.

[0:29:40] Books.

[0:29:41] They got their textbooks.

[0:29:43] And look, the Colonel wrote, students reported reading in excess of 40 pages a minute. Excess!

[0:29:50] These books are 500 and 600 words per page.

[0:29:53] So, 40 pages a minute means 20 to 24,000 words a minute, or more. The Guinness Book of World Records is 25,000. So, we're in excess of that, some of the students. Not all, by all means, not all, but some, after one one-day class, because I showed them how to use their peripheral vision, the right and left brain.

[0:30:13] And more, as I claim here.

[0:30:15] So, you want proof?

[0:30:17] I've only got a couple of dozen schools. Here's one from California State Department of Education, where I got the opportunity to teach

[0:30:24] youth at risk, which is a nice way of saying grand larceny at 15. You know, kids that hotwire cars and steal them and break into houses and deal drugs and all those kinds of things.

[0:30:35] And I got to teach them this. And while their ethics and discipline may have been a little awry.

[0:30:42] kids were bright and intelligent, and when we got out the books and I had them do these exercises, they were keen, because these kids did not want to sit in a class, you know, with someone at the blackboard explaining, no. We got our physical, emotional, we got our heart, we got our

[0:30:58] We got everything involved, and that's a real picked up on.

[0:31:02] And here you see them.

[0:31:04] He's head of the school, talking about how the kids

[0:31:08] books at incredible rates. But look, I know you're probably asking, well, why don't all the schools, you know, adopt this? Well, that just shows you

[0:31:18] Because I brought this to the California State Department of Education in Sacramento, and I showed them all of my data and so forth. They couldn't give two

[0:31:27] Okay? This is a bureaucracy. Getting a... getting a school

[0:31:31] Change from number 2 to number 3.

[0:31:33] 3 pencils, probably take Okay, literally. I demonstrated this at one school. It was a progressive...

[0:31:41] private school in the Silicon Valley, where I used to live.

[0:31:45] The principal had a son in the 8th grade, and he invited me to come do a demonstration.

[0:31:50] 8th grade kids, and his son had reading challenge.

[0:31:53] I said, okay, sure. Came in, given, I think, 3-4 hours, including So the instruction was made.

[0:32:00] And his son, amongst all the other kids, said, wow, when you read fast, you get more focused, you understand better, it becomes much more exciting.

[0:32:07] Exactly. His father's looking there, he's stunned.

[0:32:12] Anyway, we tested the kids before and after, clearly, and at the end, they did a final test on a book, they finished a book.

[0:32:20] Okay, question for you. Jane, what if...

[0:32:24] We interject testimonials here when I state something, and then we interject a quick testimonial.

[0:32:32] Not anymore.

[0:32:33] **Jane:** Be more effective, yes.

[0:32:36] Okay, let me just ask my friends. Mac, you know my friends.

[0:32:39] Okay, so if I put some testimonials in, it would be more effective?

[0:32:44] Plus 2, plus 3, plus 4, plus 5.

[0:32:47] 6, 7, 8... Okay.

[0:32:51] Alright, so...

[0:32:54] Send Mac... this... Okay, PowerPoint.

[0:33:01] Yeah, he'll...

[0:33:02] **Jane:** already has that.

[0:33:03] Okay, now, right here... We're gonna... Get Michael Tracy...

[0:33:11] Where is Michael? Okay, here it is.

[0:33:18] So, we gotta make these tight and quick.

[0:33:22] And it's Michael Tracy, M-I-C-H-E-L-T-R-A-C-Y.

[0:33:28] Wonder how you guys felt about the chorus lyrics? Ed was...

[0:33:31] Really with it, he was really straightforward, and... I learned how to read.

[0:33:37] From... A third of pays a minute.

[0:33:41] Okay, you're mad.

[0:33:42] Wow, okay. How would you compare your comprehension to before the courts? Well, at first, I guess...

[0:33:50] And are every of us?

[0:33:52] In the matter of, like, of course, like, a month, and I forget everything except for, like, the last chapter.

[0:33:56] Now, it's like, every time I read a book.

[0:33:59] My adrenaline like flows because you're reading so fast, you're just getting so into it.

[0:34:04] Right there. What made the big difference for you? Right there, that quote.

[0:34:09] So, that's from, like... Somewhere between 35 and 45 seconds, take that.

[0:34:16] Now...

[0:34:22] We're gonna, alright, we're gonna finish the video, then I'll tell you where to put what testimonials.

[0:34:51] Some were 5 minutes, the slow ones were 15 minutes on a book at their level.

[0:34:57] And afterwards he calls me into his office.

[0:35:01] And he says, Ed, great course, thank you for showing us, brilliant demonstration, I saw my son benefit amongst many of the other kids. He goes, but there's no way.

[0:35:09] can take this course into our

[0:35:11] And he goes, I know, Ed, you're gonna ask why not. He says, Ed, I got a budget of 10 books per kid per year. With your course, they'll finish that in the first month. He goes, I know what you'd say, Ed, give them the 9th grade books.

[0:35:24] What do I do?

[0:35:26] When they get to the 9th grade.

[0:35:28] He's telling me. He goes, Ed, I got 4 reading teachers on staff. They're not gonna do mental training and play music and have the kids do physical exercises?

[0:35:37] They're stuck in their old ways. What do I do? Fire them? There's no way I can adopt this system.

[0:35:42] This is what's out there, and that's when I made the decision to just sell it to the public direct, because the stupidity, inertia.

[0:35:50] Mass ignorance.

[0:35:52] Fear of doing something.

[0:35:55] is mind-blowing, Your honors.

[0:35:58] The word education comes from the Latin word educo, which means to draw out of. One of my greatest mentors taught me this.

[0:36:08] Alexander Edward, who wrote a book called Inner Wealth, Genius within.

[0:36:12] more. The genius is within.

[0:36:15] You have to get out of the way. You don't put it in and stuff it in.

[0:36:19] No.

[0:36:20] Yeah, education is.

[0:36:22] really messed up.

[0:36:23] Which is why many of the most brilliant people in whatever profession didn't come through the education system.

[0:36:29] The greatest fashion designers didn't go to fashion design school.

[0:36:37] The greatest moguls in the computer industry, you could argue Steve Jobs, Bill Gates, and so forth. They quit college. They didn't go through the traditional education system. And I'll never forget one professor who I used to...

[0:36:59] Chad, can you bring me that picture of James Asher?

[0:37:03] And the bio you made for me the other day, please?

[0:37:10] A talk with, who was a great teacher himself, said, that's because people who come through the educational system are blocked by the

[0:37:18] principles and...

[0:37:24] Chad, you made a bio of Dr. James Asher the other day for me. Can you bring it up up front, please?

[0:38:00] There he is.

[0:38:10] Okay, that's him.

[0:38:51] Can you give me a bio with, his actual picture, which I'm including here?

[0:38:57] San Jose State University.

[0:39:01] When he was born and died and I believe he was professor of the year, professor emeritus, whatever accolades he had include that in a nice bio mem.

[0:39:14] That I can include. Thank you, Chet.

[0:40:09] washed.

[0:41:24] 10% of all those purchased.

[0:41:26] It read past the first chapter. Can you imagine that?

[0:41:30] Name the equation.

[0:41:32] Then when we tell you that, what did the intelligence do to overcome your limiting beliefs? And that's not possible. I don't want to reinhouse this.

[0:41:44] Click, he goes, but the 9th grade... the zip

[0:41:50] go to fashion design school. The greatest through the educational system are blocked by the

[0:41:56] principles and boundaries around them, and someone without those principles and boundaries gets to try new things that no one ever thought of within the system. So, yeah, he was right on. So...

[0:42:10] Okay, we're going to insert here.

[0:42:13] And actually for the last 15 seconds, Dr. James Asher.

[0:42:17] And a little mem here, which Chad is making for us as we speak.

[0:42:23] If you're thinking, why is this adopted to the school system? Now you have your answer. But let's even continue.

[0:42:28] We talk about heart intelligence, left-right brain, vision, habitual training, and how to break that habit of reading word by word, okay, so that you can see you

[0:42:39] incredible power to your eyes and brain. You're with me so far, alright? Does this make sense? Well, what about lucid dreaming?

[0:42:48] You know, you go to sleep, you have a dream, you fall, you take a nap.

[0:42:51] a brilliant dream. That's a very powerful element in

[0:42:55] Underemphasized. What if you learned to dream about what you read? Do you think you'd remember it better? Do you think you'd like it better? What if you learned to use

[0:43:03] recall methods. One of them is mind maps.

[0:43:06] Mind mapping is really powerful. Now, there's a lot of variations of mind mapping, and we teach our variation, but there's many variations.

[0:43:14] One of the world's fastest readers.

[0:43:17] That's gotta be S.

[0:43:21] Creations is actually created by a man named Tony Buzan, who I happened to run into in a bookstore in the airport 1 time, and I looked at him.

[0:43:30] And he looked familiar, I said, here, Tony, do that, right? You invented mind mapping. And I introduced myself, he heard of me, I knew him, of course, and he was older than me, and I said, what a thrill, and we got a selfie together. So, mind mapping is an incredible recall.

[0:43:43] It's how the mind works, and the way you write is not how the

[0:43:47] works, okay? So most people get stuck, writer's block, and so forth. Now, I know some of you are probably asking, this is 2026 going on 27 real fast.

[0:43:58] We got AI, we got artificial intelligence.

[0:44:00] Tell me the summary report. Now, I know some of you are probably asking, this is...

[0:44:06] This is a real disconnect.

[0:44:10] This is a Dion... Dumb move.

[0:44:14] Who's that, right? Who invented mind mapping? And I introduced myself, he heard of me, I knew of him, of course, and he was older than me, and I said, what a thrill, and we got a selfie together. So...

[0:44:23] MindMap uses an incredible recall tool.

[0:44:26] It's how the mind works, and the way you write is not how the mind works, okay? So most people get stuck, writer's block, and so forth. Now, I know some of you will probably ask me, this is 2026, so my mind works, okay? So most people get stuck, writer's block, and so forth. Now, I know...

[0:44:45] Cut right before here.

[0:44:47] we gotta undo Dion's

[0:44:50] There's lock and so forth now I know some of you are probably asking this is 2026 going on 27 real fast.

[0:44:58] We got AI. We got artificial intelligence. It can tell me the summary of a book.

[0:45:03] Okay.

[0:45:04] So really, you just need to cut out this dumb shit.

[0:45:09] Now I know some of you are asking.

[0:45:14] Cut out the 2627. Okay, so most people get stock, riders, block, and so forth. Now, I know some of you are probably asking, this is 20... Cut this bullshit out. 2026, going on 27... This is out. ...real fast.

[0:45:29] We got it.

[0:45:30] Some of you are asking, we got artificial AI, artificial intelligence.

[0:45:43] Got it, sir.

[0:46:20] Chad, it says it's unable to load those files. Can you rewrite them and make sure they're loadable? Thank you.

[0:46:39] Chad, it said it was unable to locate or load those Dr. Asha files. Could you rewrite them and place them here so they're loadable? Thank you.

[0:46:55] AI, we got artificial intelligence, it can tell me the summary of a book real quick, yeah, ok, it can.

[0:47:01] So that computer gets smarter, and AI will get smarter and smarter and smarter, and you get dumber and dumber and dumber. That's what happens. Now, when you exercise your brain and all your intelligence, what happens to your body, mind, and soul? Does it get smarter? Of course it does.

[0:47:17] Do you want to get smarter? Or do you just want to lay on the couch and have computers telling you everything?

[0:47:22] You yourself can do nothing. Not the best tactic.

[0:47:25] Not at all. The way you get smarter is by overcoming challenges.

[0:47:29] and learning new Does this make sense to you? Are you buying... What I've seen...

[0:47:37] To understand the power of.

[0:47:41] And the power of books.

[0:47:43] The books you like.

[0:47:45] Lots of books out there are incredible, but only if you have the time to read them and remember what they say. So my question to you...

[0:47:52] Is which 3 books would you read first after Mastery?

[0:47:57] Which street? I got a book here. Male body and owner's den.

[0:48:01] I picked it up for a dollar at U.

[0:48:03] Okay.

[0:48:05] Think I could learn something there?

[0:48:07] I may be healthier as a result. Could it save me from a disease? Could it make me feel better, look better? Of course! But I have to weave that. That'd probably take me half an hour. It would have taken me a month.

[0:48:20] And I probably never would have finished it.

[0:48:22] In fact, publish your secret. 90% of all books purchased.

[0:48:27] Never get red past the first.

[0:48:29] Can you imagine that? 90%. And the average American, it's been said, reads less than one book a year. Now, they watch 4 hours of TV or more.

[0:48:39] read less than one book a year.

[0:48:41] What's happening to their intelligence as they're watching 4 hours of TV and not reading? What do you think? Yeah, does TV make you smarter? My mom used to call it the idiot box. Turn that thing off! Idiot box.

[0:48:52] She had a point.

[0:48:54] And she cared. So...

[0:48:57] It even gets better, because we have our conscious mind, which is what we're aware of, and our subconscious mind.

[0:49:03] Subconscious knows everything we've ever done, but we can't recall it instantly. What's that person's name? What happened there? Yeah, it'll come to you.

[0:49:12] That's the subconscious. The conscious is what you're thinking of, and for most of us, we can think of 5 or 7 things at one time. So, I'm excited to share this with you.

[0:49:22] Which 3 books would you read first, and why? And what's the value of your

[0:49:26] That was 3 bucks, where they'd be 3 bucks...

[0:49:29] No, that's a real clumsy edit he did.

[0:49:33] They're in our subconscious mind. Subconscious knows everything we've ever done, but we can't recall it instantly. What's that person's name? What happened there? It'll come to you.

[0:49:44] That's the subconscious. Conscious is what you're thinking of.

[0:49:47] And for most of us, we can think of 5 or 7 things at one time. So, I'm excited to share this with you.

[0:49:54] Which 3 books would you read first, and why? And what's the value of your

[0:49:58] those three books. Whether they be three books on real estate, three books on health.

[0:50:02] And what's the cost if you don't have the time?

[0:50:05] But Czechoslovakia don't have the time to read those three books on health. Reading about the dangers of certain foods and patterns and so forth.

[0:50:12] The benefit of feeling great.

[0:50:15] Strong and healthy, living a long life, staying out of the hospital in doctor's clutches.

[0:50:21] With their drugs and surgery, toxic

[0:50:24] Debilitating. Painful. Yeah, I want to stay away from that. I love health. And when you see the other side of what I do.

[0:50:33] You learn how to improve your health naturally with higher energy.

[0:50:36] So, when I say Healing Genius, show my Healing Genius logo here.

[0:50:42] Imagine that. So, with that, we've got a special offer, and I'm gonna give you a special code, ED777.

[0:50:50] get a discount. When... So put up your discount code at 777.

[0:50:57] your skill set.

[0:50:58] become a member of our community.

[0:51:00] yourself.

[0:51:01] Are you ready to adapt this new skill? Build your intelligence.

[0:51:06] Take on the power of books.

[0:51:08] And all of the knowledge that they have to share with you.

[0:51:11] I mean, just think of it. Everyone typically wants a house or owns a house. If you knew some of the things that now I know about the real estate industry, you could save yourself 25, 50, hundreds of thousands of dollars, nevertheless invest and make money. It's huge.

[0:51:24] Even further, I... when I grew up, I used to be a fisherman. Sometimes we'd catch fish, sometimes we didn't.

[0:51:31] There was always this one boat that was out there when we were, and they always had a big bucket full of fish, always 2 or 3 times the amount that we caught. And they were fishing in the same waters.

[0:51:41] Why are they catching so many more? Some people know things, and they put that knowledge in books to share, especially when they get older. Well, oftentimes I had to go to the fish store to buy fish after I came back from fishing, without anything. If I knew what that guy knew, if I could read 3 books on fishing back then, oh.

[0:51:58] That alone would have paid for this course many times over. So what can it do for you?

[0:52:02] That's the question you have to answer.

[0:52:05] You have to take action. You have to say, don't rely on ChatGPT and AI to do it.

[0:52:11] That just makes you dumber. You want to become smarter, don't you? And develop your genius and be intelligent.

[0:52:20] If we could make this unisexual, no tits, that would be better.

[0:52:26] No legs crossed.

[0:52:28] And the intelligence systems already inside you that we show you how to use.

[0:52:34] That's your genius system, and now we apply it to reading. How else you can apply it?

[0:52:38] really exciting and I'm excited for you.

[0:52:41] So, much love to you, I'm Ed Stracher, thank you for watching, and I look forward to seeing you in

[0:52:47] Put up the discount code again.

[0:52:50] Take care.

[0:52:52] Okay. Now... So you have the edits on this.

[0:52:57] This is 24 and 22, I gave you...

[0:53:00] Probably a couple minutes to cut out. We're gonna add some... Quick testimonials.

[0:53:07] Quick sound bites. So I already told you where to put Michael Trace.

[0:53:13] Michael Tracy.

[0:53:16] And what was the time code on where Michael goes?

[0:53:25] Cool, if... but there's no way.

[0:53:28] So when you're talking about the principal, What's that?

[0:53:33] **Mac:** Time where you talk about the...

[0:53:35] Yeah, yeah, yeah, all right. We'll find an exact number. Came in and given, I think, three-fourths of about 100.

[0:53:42] And afterwards, you can hear his stun.

[0:53:45] I couldn't believe it. Anyway, we tested the kids before

[0:53:48] in Sacramento at school, and I said, okay, sure. Came in, given, I think, 3-4 hours, including lunch, so instruction was

[0:53:56] And his son, amongst all the other kids, said, wow, when you read fast, you get more focused, you understand better, it becomes much more exciting. Right there. All the other kids. Right there. Right before he couldn't believe it.

[0:54:10] Okay, then after... Then Michael says...

[0:54:17] I went from reading a third of a page a minute to 60 pages a minute.

[0:54:22] And... What do you like best about the chorus lyrics? Ed was... really, really with it.

[0:54:28] It's really straightforward, and... I... I learned how to read.

[0:54:33] from a third of a page a minute.

[0:54:36] About 60K a minute.

[0:54:39] Right there. Wow, okay. How would you...

[0:54:41] In her incomprehension, to... before the course. Well, at first, I guess... And I have your book.

[0:54:50] And now I write, of course, like, a month, and I forget everything except for, like, the last chapter.

[0:54:54] Now, it's like, every time I read a book.

[0:54:57] My adrenaline like flows because you're reading so fast and just getting so into it. Yeah, okay, so that we have.

[0:55:04] And so, add the third of a page.

[0:55:08] To 60 pages a minute, and that'll come after. It becomes much more exciting.

[0:55:13] Exactly! His father's looking at her, stunned.

[0:55:17] I couldn't believe it. Anyway, we tested the kids before and after. Clearly, and at the end, they did a final test on a book. They finished a book, some were 5 minutes, the slow ones were 15 minutes on a book at their level, probably about 100.

[0:55:31] Right there, after 120 pages, you put from a third of a page.

[0:55:37] To 60 pages a minute.

[0:55:43] Okay.

[0:55:44] Now... Let's go...

[0:55:55] Emotions.

[0:55:56] emotional intelligence.

[0:55:58] Well, what if I could show you how to get your emotions and your feelings involved, so you can feel what's happening in that book? And regard...

[0:56:06] Regardless of whether it's story or a book on science, doesn't matter right there, doesn't matter.

[0:56:12] And we're gonna end... Give Don well. Don Graves.

[0:56:19] Where is Don Gray?

[0:56:25] "I don't see her, Jane. Where is she?" She's a schoolteacher.

[0:56:31] Black hair...

[0:56:32] **Jane:** And...

[0:56:35] Black hair...

[0:56:42] Where's Dawn? She's a star.

[0:56:49] The other.

[0:56:50] **Jane:** PowerPoint?

[0:56:53] Is... this is the master.

[0:56:59] **Jane:** Here's another one.

[0:57:25] Find her.

[0:57:27] No, I see it's not here.

[0:57:31] And she says they're kind of, and I felt them.

[0:57:35] **Jane:** Yeah, I remember that part that she said that.

[0:57:40] Okay.

[0:57:41] So, she's gonna get you Dawn Graves.

[0:57:45] Teacher, where she's gonna say,

[0:57:50] how she read, and she goes, and I felt them.

[0:57:53] And they were scary stories, so I kind of scared myself.

[0:57:57] That goes right here at 1131.

[0:58:01] Okay.

[0:58:02] When I talk about the vision, neurological pathway.

[0:58:06] We call it the audio verbal channel.

[0:58:09] keep it simple. Your eyes, however, your eyes are basically an extension of your brain. When a baby is formed inside a mother's womb, the eyes are literally part of the brain, and it's one organ that then becomes two. That neural pathway

[0:58:23] dispute versus how you've habitually been trained to just read one word.

[0:58:28] Yeah, it even gets... Okay.

[0:58:31] Right here, before it even gets worse, you insert Martin Crowe.

[0:58:38] And you know Martin Crowe because you're using him in your video, and that same...

[0:58:43] I began to read a third of a page at a time.

[0:58:49] You with me?

[0:58:50] Yeah!

[0:58:52] Okay, that goes there.

[0:58:56] Then at the end, when I say which 3 books.

[0:59:01] Three books on health. And what's the cost if you don't have the time?

[0:59:05] Of course we don't have the time to read those 3 books on health. Reading about the dangers of certain... Of course we don't have the time to read those 3 books on health. Reading about the dangers of certain foods and patterns and so forth.

[0:59:18] The benefit of feeling great.

[0:59:20] Strong and healthy.

[0:59:22] Living a long life, staying out of the hospital in doctors' clutches.

[0:59:26] But they're... And healthy, living a long life, staying out of the hospital in doctors' clutches.

[0:59:34] Cut out with their drugs and toxic surgeries, cut that out.

[0:59:41] Staying out of the hospital, that's it.

[0:59:44] The benefit of feeling great.

[0:59:47] strong and healthy.

[0:59:48] Living a long life, staying out of the hospital.

[0:59:52] Staying out of the hospital, and doctors... In doctor's clutches.

[0:59:58] Cut out with their drugs, with their drugs and surgery.

[1:00:02] toxic Debilitating, painful. Take that out. Yeah, I want to stay away from that. I love it all.

[1:00:12] Yeah, yeah, take that out and say, yeah, come back in, yeah, I want to stay away from that, I love health.

[1:00:17] Then, you're gonna insert... Terry Weinberg.

[1:00:28] Who is...

[1:00:52] Right here.

[1:00:55] This is Terry.

[1:01:00] I'm a member of the United States Coast Guard Auxiliary, and I was taking

[1:01:05] A test. I didn't want it.

[1:01:07] Read all the material that was involved. There's 5 books.

[1:01:11] And I just was putting off and putting off, and I took this course...

[1:01:15] And after, I went home the following day, I read all 5 of the books, and...

[1:01:21] Of course, the first time, at 85%, so...

[1:01:25] Okay, so you can use that whole thing.

[1:01:28] Right there.

[1:01:30] Okay, and I'm gonna give you...

[1:01:37] **Mac:** Where am I gonna put it again?

[1:01:39] Okay, I'm gonna show you right now...

[1:02:01] Make sure I just sent it to you in the video in the link. I don't know if I sent you a video or just took the still.

[1:02:10] **Jane:** Yeah, it's just a steal, I'm gonna send him that exact video.

[1:02:14] Okay, send them that, and that's gonna go...

[1:02:24] Five or seven things at one time. So, I'm excited to share this with you.

[1:02:28] Which three books would you read first, and why? Right there.

[1:02:33] Which 3 books would you read first and why? Right in there.

[1:02:37] After that, that goes, that's where that goes.

[1:02:43] Got it, got it.

[1:02:48] Something you already have, I don't have to teach you.

[1:02:51] All you have to do is break the habit that you learned in school, and that habit is not broken anymore.

[1:02:56] for years now.

[1:03:00] In 10 minutes.

[1:03:02] It's one. We have this incredible heart. The heart literally has brains of incredible intelligence.

[1:03:09] What a concept.

[1:03:11] What if you could employ that intelligence while reading?

[1:03:14] What a concept.

[1:03:16] And I'll show you how to do that.

[1:03:17] Right there, we insert cute little Sonya.

[1:03:22] Okay, you know how cute a little sign you is, Jane?

[1:03:28] Ed.

[1:03:28] **Jane:** Girl, black...

[1:03:31] 11 year old... From Australia.

[1:03:35] Gorgeous little girl.

[1:03:38] Right there.

[1:03:45] I just finished illustrating Junior Cross. Oh, I really enjoyed it.

[1:03:51] I read a hundred. So start with, I read a hundred.

[1:03:58] the front.

[1:04:00] Feel like I understood him? Yep.

[1:04:02] Cut that out.

[1:04:06] What was different for you? What made you read so much better this time? I just felt different. I really got into the book.

[1:04:13] Oh, wow.

[1:04:15] I have not been to that little little place. Cut. That's it. That little girl's smile.

[1:04:23] Right there. So I read 117 pages in 6 minutes.

[1:04:28] Did you understand better? Yeah, much better.

[1:04:31] What was different, I really got into the book really well, and I hope I can do that with all the books I read.

[1:04:38] That's it, right there.

[1:04:43] **Mac:** Got it.

[1:04:56] And...

[1:05:01] One more... Where I discuss mental training.

[1:05:11] Yeah, where... what's the time code on that?

[1:05:17] **Mac:** It's much earlier. Yeah, before that ice.

[1:05:30] Right here.

[1:05:34] It's about mental training.

[1:05:36] We're rehearsing.

[1:05:37] shooting the foul shots in their mind. So, when they compared, after a certain amount of training.

[1:05:43] Two groups, both groups improve dramatically.

[1:05:46] from where they've started. And the interesting thing was, they each improved to about the same level. So whether they had the physical training or the mental training, they each improved to about the same level. Now, the real question is, what if they had both the physical and the mental training? Well, that's optimal.

[1:06:02] And that's what crows did to me.

[1:06:04] The physical and the mental.

[1:06:05] Well, and Radie, using both your focal and peripheral, understands exactly what

[1:06:11] And that's what crows did to me.

[1:06:13] The physical and the mental.

[1:06:14] Well, in Radiant Genius, we do the mental training, the physical training in the book, it's just

[1:06:19] I hate this.

[1:06:20] Trivial.

[1:06:21] I'm like basketball or weightlifting.

[1:06:23] You work brilliantly. Once your mind understands exactly what you

[1:06:27] You're fully committed, and full commitment is always what it takes for you

[1:06:33] And us, to perform at our best.

[1:06:35] Do you agree?

[1:06:36] And.

[1:06:38] Wouldn't you agree? Point, cut, right there.

[1:06:41] And that's where we're going to include...

[1:06:50] Jonathan Ezzie.

[1:06:55] And Jonathan... Yeah.

[1:06:58] **Mac:** I'm gonna say Harper.

[1:07:04] **Jane:** One that, roller hockey.

[1:07:06] Exactly.

[1:07:10] This place is kind of,

[1:07:13] Crop, but I... yeah, that's all under there, right there.

[1:07:16] Mmm.

[1:07:19] I, did the course 2 weeks ago, and, what I found was that it's absolutely phenomenal. I went to the course, and I was really struggling with it. I was struggling with, reading.

[1:07:29] Because basically, I was expecting something in my mind. When I let go, when I let, all my inhibitions or my worries of not being able to do it, just fade away. And following what Ed Strachan's teaching.

[1:07:41] It's the change in my life. I came back, two weeks later, to a refresher course.

[1:07:45] And what happened in those two weeks was that not only did my rigging increase.

[1:07:49] Right there, not only did my reading increase... I play roller hockey, and I can honestly say that I have scored more goals in the last two weeks than I have in my whole career, simply because of the focus techniques that S. Shasta taught. My reading speed was four pages.

[1:08:05] In 6 minutes, now I'm reading 13,200 words.

[1:08:09] six minutes which is about 195 pages. It is absolutely phenomenal.

[1:08:14] Right there.

[1:08:15] Okay, so Jane, you send them that way.

[1:08:25] And then we'll include one more about the eyes.

[1:08:30] We're gonna include Deborah.

[1:08:38] And so... with the eyes.

[1:08:44] never needed lessons.

[1:08:46] You learn to read.

[1:08:48] 3, 4, 5, 6 years, I had to get him

[1:08:50] In front of a group, terrifying, most, most, very limited, basically an extension of your brain. When a baby is formed inside a mother's womb, the vertebrate highway.

[1:09:00] Before books were mass produced at the speed of huge fiber optic superhighways.

[1:09:07] So, imagine what's possible, then, if you could read using that superhighway.

[1:09:13] That works at the speed of light and can see everything at once.

[1:09:16] Right there.

[1:09:18] Versus how you've habitually been trained to just read one word.

[1:09:23] Cut. Cut. Cut.

[1:09:26] Right before it even gets worse, Then you insert Deborah.

[1:09:33] I can actually see larger sections of the page, sometimes paragraphs, sometimes when I'm a lot more confident and a lot more settled, I can turn the pages over and comprehend and take it in.

[1:09:44] Before I started the course, I was using reading glasses, basically because my eyes became really tired. Now that I've learned to move my eyes in a way that they're more comfortable with doing, rather than going across the page, my eyes don't get tired. I don't need my glasses anymore, which is fantastic.

[1:10:02] So Ray.

[1:10:07] Before I started the course, I was using reading glasses. Before I started the course.

[1:10:14] Before I started the course, I was using reading glasses, basically because my eyes became really tired. Now that I've learned to move my eyes in a way that they're more comfortable with doing, rather than going across the page, my eyes don't get tired. I don't need my glasses anymore, which is fantastic.

[1:10:30] Okay, good. Now we need one black eye.

[1:10:34] I've got two black guys in the testimonial.

[1:10:36] **Jane:** George, George.

[1:10:39] George and Will.

[1:10:41] **Jane:** Willie Harper.

[1:10:43] Now this guy's.

[1:10:45] Graduate medical student. He's a medical student.

[1:10:49] At the end, I was reading about 10 pages a minute, which to me is great. I used to read about a page a minute.

[1:10:56] My comprehension has slightly increased. I'm understanding the material much better.

[1:11:01] And it's much clearer.

[1:11:03] Okay, right there. So we take that... And... We're gonna... put that...

[1:11:15] However, that's a standardized test.

[1:11:19] is three or three parallel roads or more you can only got a couple of dozen

[1:11:24] Here's one from California State Department of Education. We got a couple of dozen, so... so we're in excess of that. Some of them stoop. Not all. By all means, not all. One one-day... one one-day class, or more. The Guinness Book of World Records is \$25,000. So we're in excess of that. Some of them stoop. Not all.

[1:11:43] By all means, not all, but some after one one-day class, because I showed them how to use their peripheral vision, the right and left brain.

[1:11:52] and more, as I claim here.

[1:11:54] So... You want proof?

[1:11:58] I've only got a couple of dozens.

[1:12:01] So, right before, so you want proof... Then you put in.

[1:12:05] George Owidi.

[1:12:08] Which satisfies our need for a black guy.

[1:12:11] Okay?

[1:12:14] Got it.

[1:12:17] Yeah.

[1:12:22] Okay.

[1:12:23] Alright, I think we're done.

[1:12:26] Hehehe.

[1:12:27] Yeah. Okay, now let me see... If we got the... Chat GPT got it right.

[1:12:47] I'm trying to download this... Ready...

[1:12:58] See, I just put this... In, in your telegram, Matt, can you open it?

[1:13:06] Let me see.

[1:13:24] **Mac:** It doesn't give me the PDF.

[1:13:27] Yeah, yeah, I see.

[1:13:30] Okay.

[1:13:50] All right, let's go to Gemini.

[1:14:07] Gemini.

[1:14:08] I need a short bio of Dr. James Asher, A-S-H-E-R, from San Jose State University, that includes the date of his birth and death.

[1:14:20] And his accolades, I believe he was Professor Emeritus, and he had a method called Total Physical Response, and here is...

[1:14:29] his actual picture to include that I need a nice meme slash bio please

[1:14:42] His wife is about to have a baby.

[1:14:51] And he just ran away.

[1:14:53] See what he stated?

[1:15:26] Okay, Gemini, that's kind of colorful, cartoony. Can you make it look like a Wikipedia or an encyclopedia?

[1:15:35] Something a little more official and formal with his actual picture.

[1:15:45] You okay, Mac?

[1:15:48] **Mac:** lawyer.

[1:15:51] My cats were fighting.

[1:15:54] He, oh, your cats were fighting.

[1:16:00] Okay, perfect.

[1:16:08] Okay, there's Dr. James Asher. You can just use the top half of that Wikipedia.

[1:16:20] All right, we're all set. James.

[1:16:23] I offered, his wife was hurting, I offered to do a 1 minute prayer, he refused, saying the doctor said it's probably just, you know, pains.

[1:16:32] He doesn't know about the idiots and doctors yet and how I raise a soul's energy.

[1:16:38] Something doctors could never do.

[1:16:41] Anyway, with that being said, Mac, thank you so much, Jane, give him the Notes for this...

[1:16:50] **Jane:** proud.

[1:16:50] them, And, I'll send you the Fathom. Mac, thank you so much. I'll see you Monday.

[1:16:57] Okay, good luck with your wife. If you name your.

[1:17:00] **Mac:** baby.

[1:17:00] Yeah, to me, Mac, you get a bonus.

[1:17:02] **Jane:** Hey, that's really true, because there was one staff who actually did it, man.

[1:17:09] **Mac:** Now I'm tempted.

[1:17:12] Yeah, there's a bonus. Your name would have to be Little Eddie.

[1:17:16] Okay.

[1:17:16] **Mac:** My wife's gonna kill me, but yeah, it's worth it.

[1:17:20] Yeah, she'll get over it. Trust me, she'll get over it. Alright, Mac.

[1:17:24] Much love to you.

[1:17:25] Yeah, see, like what I said.

[1:17:28] **Jane:** Bye-bye.

[1:17:28] Thanks so much.

[1:17:29] **Jane:** sir.

[1:17:30] Thank you, thank you.
